

### Step 3a: Vegetation composition field sheet: (ii) all species identified

- In each management unit, record as a tally the times that each species is 'hit' in the 100 step transects. Each step counts as a 'hit'. More than one species may be 'hit' at each step.
- Record also the number of 'hits' of rocks and bare ground or litter.
- Total up the number of 'hits' of each species, rocks and bare ground in each management unit.
- Note the growth form (grass, wildflower, shrub, tree)
- Using your knowledge or a field guide, indicate whether the species is native or introduced.

Species name	A		B		C		D		E		F		G		H		I		Growth form	Native introduced
	Tally	Total	Tally	Total	Tally	Total	Tally	Total	Tally	Total	Tally	Total	Tally	Total	Tally	Total	Tally	Total
